

## Brief Summary

Total Sample	TTL	GLY-AMPA	Positive	TTL Toxic	% Gly-AMPA	% GLY-AMPA-Trace	Average Gly-AMPA ppb
CANADA	24	9	6	15	38	63	60.57
UNITED STATES	24	12	1	13	50	54	36.02
CHINA	1	0	0	0	0	0	0
HONG KONG	1	0	0	0	0	0	0
INDIA	1	0	0	0	0	0	0
JAPAN	1	0	0	0	0	0	0
THAILAND	1	0	0	0	0	0	0
BOLIVIA	1	0	0	0	0	0	0
CHILE	1	0	1	1	0	100	0
GREECE	3	0	0	0	0	0	0
ITALY	1	0	0	0	0	0	0
SPAIN	1	0	0	0	0	0	0
SOUTH AFRICA	2	0	1	1	0	50	0
PERU	1	0	1	1	0	100	0
UNKNOWN	37	11	13	24	30	65	22.59
<b>Organic</b>	24	9	2	11	38	46	<b>6.37</b>
<b>Non-Organic</b>	76	23	30	53	30	70	<b>39.49</b>
<b>Gluten Free</b>	9	5	0	5	56	56	<b>28.16</b>
<b>TOTAL SAMPLE</b>	100	32	32	64	32	64	<b>31.54</b>

This brief analysis is drawn from the results of the samples in the preceding pages.

60.57% of Canadian samples and 36.02% of US samples had some amount of glyphosate/AMPA. Out of that, 38% of Canadian Samples and 50% of US samples had measurable quantities of Glyphosate. Canadian Samples had more occurrence of trace amount showing up on Glyphosate Screening.

When we add up all the Glyphosate content of samples from a country and divide them with the total number of samples from the same country, we get the ratio, or the average, of Glyphosate content per sample. The right most column shows that, in parts per billion. Based on the first hundred sample data so far transcribed, Canada seems to have the highest per sample glyphosate content, in North America, and perhaps the world. The difference between Canadian average (60.57 ppb) and the American average (36.02) appears

## Brief Summary

to be huge. The toxic technology might have originated in the US and being pushed by the US, but based on this small sampling, Canada seems to have overdone USA in contaminating its food with glyphosate.

A large number of samples were of unknown origin, but collected from within Canada. Average Glyphosate content in the unknown origin samples were much lower, at 22.59.

Samples from the rest of the world are very few, but fas as I cans see, the food from the rest of the world is cleaner than the North American, when it comes to Glyphosate contamination. One puzzling item is the kiwifruit imported from Chile. It had measurable quantity of Glyphosate. I do not know how that is possible, unless the fruit itself is genetically modified as RoundUp ready and being grown in Chile. As a result of this, I have become vary of eating a kiwi till I know more.

These figures keep oscillating as more data is entered, but some trends are now beginning to emerge - more on this later.
