The post features a photograph of a young woman, Shivani Bodkhe, smiling. Below the photo, the text reads: 'Friends, Just wanted to inform everyone about the sudden and shocking demise of our batch mate and friend - Miss Shivani Bodkhe. She expired on 19-05-2021 after being on ventilator of more than a week. She took vaccine on 06-05-2021 after which she started feeling uneasy and was hospitalised where doctors found that she had developed blood clots in her brain and was declared brain dead. Medical cause of death - Central Venous Sinus Thrombosis. May her soul RIP 🙏'. The time '11:09' is visible in the bottom right corner of the post.</p>

Andhra Pradesh: Guntur

Mr. N. Koteswara Rao (85), died on May 25 due to contracting Covid Pneumonia, weeks after receiving second dose of Covaxin COVID-19 vaccine.

When contacted, Bharat Biotech said, "occurrence of deaths have been reported with all Covid-19 vaccines & it's because of breakthrough infection from the virus that's widely circulating".

To,

Whom so ever concerned.

This is to inform you that my grandfather Mr. N. Koteswara Rao, 85 years old had taken his 2nd dose of Covaxin in the first month of April and tested positive in the first week of May. Even though he tested positive we were hopeful of his recovery since he had taken his vaccine and he doesn't have any severe comorbidities except diabetes. But, unfortunately he had passed away on May 25th due to severe pneumonia of the lungs. We are still not able to believe this happened after being fully vaccinated and having been told that there would be no case of mortality if vaccinated. PFA proof of vaccination for your reference.

Thanks and regards,
Anila Nalluri
